

Esports Flypack

LTN

Trusted delivery of your esports video transmission

We understand the importance of engaging your global audience across all platforms with the highest quality and reliability in real time. That's why the world's leading broadcasters and streaming platforms trust LTN to deliver the most valuable content with confidence.

GLOBAL REACH: Reach fans with access to gaming platforms and broadcasters worldwide

RELIABILITY: Multiple secure end-to-end paths to ensure no single point of failure

QUALITY: Enhance customer experience with real-time, crystal clear video in 1080p

SCALABILITY: Agility to respond to market demand anytime, anywhere, instantly

LTN Flypack

Your mobile connection to the LTN Network. The easily transportable Flypack packs the power of a satellite truck into a carry-on, so you can deliver your content from anywhere to everywhere, all with the flexibility and support of a fully managed global network.

Connect to over 3,000 global broadcast and digital locations

SOURCE: Connect from anywhere in the world through an LTN connected location or with an LTN Flypack

LTN NETWORK: Send your content in any format to our fully monitored and managed network of tier 1 nodes

DESTINATION: With connections around the world, LTN can deliver your feed anywhere, to as many locations as you wish

Focus on the event, not the transmission

LTN Esports Management Service provides real time monitoring, support and event management for flawless transmission. Our 24/7/365 Network Operations Center monitors your event, providing real time customer support and issue resolution for a seamless user experience.
