

# LTN LEAF Flypack

LTN

## The power of one

Whether it's for news, sports, enterprise or special events, the LTN LEAF Flypack, combined with LTN's global IP network, is the one solution for the transmission of your live video.

The LTN LEAF Flypack™ enables professional broadcasters to deliver live events easily, conveniently and globally. The Flypack offers the power of a satellite truck at a fraction of the cost and in a compact carry-on-sized package while reliably maintaining broadcast quality, low latency and worldwide reach.

A complete solution for a wide range of live events, LTN's LEAF Flypack uses a highly redundant, fully managed and controlled IP-based network designed specifically to provide a virtually instantaneous live experience.

### LTN LEAF Flypack features:

- Case size: 21.64" x 13.87" x 9"
- Weight: 35 pounds
- Pre-engineered and easily transported via rolling case
- Available with multiple Encode and Decode options
- Encodes and Decodes up to 20 mbps
- SD and HD support
- Plug-and-play setup
- Encryption available

### LTN fully managed network benefits:

- Manages and controls video flows from origin to destination
- Corrects for jitter and packet loss
- Leverages global private backbone network
- Ensures latency less than 200ms end-to-end
- Enables point-to-point and point-to-multipoint
- Features full network redundancy
- Provides 24/7 customer support via the LTN NOC
- Offers online customer monitoring and booking portals
- Connects to broadcasters, news and sports networks, switching hubs and teleports

One LTN LEAF Flypack | One transportable package | One fully-managed LTN global IP network
